Press Release

For Immediate Release

RELAIS NORDIK ANNOUNCES THAT CUSTOMERS WILL NOW BE ABLE TO RECEIVE ALERTS REGARDING THE MARITIME SERVICE OF ANTICOSTI ISLAND AND THE LOWER NORTH SHORE

Rimouski, April 8, 2021 — Relais Nordik wishes to inform customers of the Lower North Shore and Anticosti Island service that it is now possible to subscribe to an alert system in order to receive operational information regarding the maritime service. This application is possible thanks to the collaboration of the Société des traversiers du Québec (STQ).

Indeed, it is by going to the home page of the STQ website at www.traversiers.com, that customers can create an account in order to subscribe to alerts for one or more ports. These alerts can be received by text messaging or email.

These alerts are intended to inform users when special conditions require changes to the regular schedule of the *M/V Bella Desgagnés* or any other relevant information.

Relais Nordik invites all users to subscribe now, in order to allow better communication between the company and its customers.
